Registry Live Watch is a small Windows application whose purpose is to help you monitor a user-defined registry key for several changes (subkeys, subvalues, or security). The advantages of being portable Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to keep an eye on your registry keys on the breeze, without having to go through installation steps. Intuitive layout Registry Live Watch delivers a user-friendly interface where all dedicated parameters are bundled in the primary panel, so you can easily tweak them. Everything is kept as simple and clear as possible, so even rookies can master the entire process with minimal effort. Easy-to-handle features The program gives you the possibility to select the root key from a drop-down list (e.g. HKEY_LOCAL_MACHINE, HKEY_CURRENT_USER, HKEY_CLASSES_ROOT, HKEY_USERS), enter a custom key that you want to monitor, and watch for the desired changes (all, keys, values, or security). Additionally, you can make the program trigger an action when a key is modified, namely pop up a notification messages, execute a user-defined program, or log the information into a log. Last but not least, you are allowed to start or stop the monitoring process, save the log to plain text file format, as well as clear the log with just one click. Bottom line All in all, Registry Live Watch comes packed with several handy features for helping you monitor the changes applied to a particular registry key. The intuitive layout makes it an ideal app for rookies and professionals alike. Is there anything that's even better than actually watching your television? Yeah, me neither, but this little gadget out of the Netherlands sure looks like a good idea. It's called TIWIS and it was created by designers at NOVA that know what is good. Take a look! Today we'll show you the latest video from the team of Nokia X1 that's been working on their apps. The newest app is called 'Blender 1.0' and it's a well-made app that supports 3D animation,it's weird, but it's kinda cool too. Take a look! Check out this new video from the guys at

What's New in the?

Registry Live Watch is a small application designed to help you keep an eye on a specific key in your Windows registry for changes. The software has been developed by the same team that provided the Windows Registry Registry Backup for many years. We use a specialized algorithm to perform a full registry scan (detecting all keys and values) in order to make sure the latest information is loaded in the app. After the initial registry scan, you can specify which key you want to monitor. During the scan, the program will show you the latest data set for each detected key and its subkeys (if any). The settings dialog allows you to customize the initial scan, the way the program will act when a key is modified, the directory where the log will be saved, and several other features.
