XForce Foundation 2012.Q: How to send a message from background/notification service to main app with foreground service I have a background service that should send a message to the main app when it receive a message, so I started with this simple logic: `SendBroadcastNotification(MainActivity.this, 1)`; from the background service (In the `myBroadcastReceiver` class I do a call to `sendBroadcast` but to do it I need the class `Context`, so I moved it to the background service as `MainActivity.this`) In the main app I register this as a foreground service in the `onStartCommand()` method In the `onStartCommand()` method I receive the message from the background service `public int onStartCommand(Intent intent, int flags, int startId) { Log.i(Constants.TAG, "onStartCommand in MainActivity"); this`
