Since then he has written a total of nine books for children, and his versatility is an inspiration to many writers of other genres. His career has also included comedy, television, film, and radio. Most of Hollis's books are written in collaboration with his wife, Philippa Pearce. They have been adapted for the stage, and have achieved theatrical success with Love, Guilt and Goodbye. When asked to contribute a piece of writing to the collection... I'm an old-fashioned writer: I don't like being hurried. When I first started out I thought I would write one book a year, but gradually I realised that's not true, so I write two or three books a year now, but I write them very slowly. Menu “The Wizard of Lies” (2012) From the titular claims in the opening titles, the revelation in the cast list, and the sense that it’s a horror/thriller film, and yet it’s a film that’s meant to be seen in a theatre, The Wizard of Lies is a movie made for the kind of cult audience that is going to enjoy it, not the kind of audience that’s going to say, “Oh, this is scary,” but who is going to be doing things like pulling out their cellphones to text someone when the movie starts and who’s going to want to get up and leave the theatre early. The Wizard of Lies begins with a man (Mickey Rourke) named Rick Deckard, who works for the government (called, wait for it, “The Syndicate”) and whose role is to assassinate the worst human criminals. Because he feels like he’s “in a rut,” he’s taken on a case from the top of the “most wanted” list: an immortal (Sean Young) who is a serial killer with the special talent of being able to speak to anyone he’s previously killed. After Rick kills her, she tells him that she has special powers, and also, if Rick doesn’t kill her she
