BB TestAssistant Pro V2.0.5 Now the program has become extremely advanced and contains a lot more functionality. To make use of the capabilities of the program, there is a relatively long setup process. The most important option of the setup is the Video Quality Mode. This setting can be changed in the "options" tab. Other important options include the limit of recording time and the quality of the sound capture. The program has a very easy interface that does not demand special skills or knowledge in the use of software. After the installation you can use BB TestAssistant to create short videos which are then sent on Facebook. Additional features are limited only by your creativity. Basic features of BB TestAssistant: Record the entire desktop screen. Takes videos from the webcam or any other input device. Records microphone input. Gives you complete control over all aspects of the process. It uses an easy to use graphical user interface. The program is very lightweight with the general interface, which makes it easy to use even for beginners and in addition it is suitable for both power users and beginners. However, there is a slight learning curve to the usage of the software. BB TestAssistant Features: Record videos as desktop screens with options such as saving only a select number of frames, or recording a specific window or as an entire desktop. Captures audio from the microphone for recording additional sound clips. Captures images from a webcam. Combines several images or video clips to create images of picture galleries.
