Phasing is a popular effect method, but it can often be difficult to achieve the desired result. To achieve a more natural and believable effect, a new technology is starting to show its potential. It is called the UnfoldingWave. It is said to be a natural emulation of human vocal folds and relies on natural physics of sound interaction to create resonant wave nodes. Step 1. Get the program that you downloaded from the link above. Open the program and follow the installation instructions. Step 2. Run the program. The program will detect your audio device and import your previous archives. Step 3. Select your desired file. Double click to open it in the program Step 4. Adjust the sliders and click "Start" to start the phasing and the virtual processing. Step 5. You can adjust the frequency
