Best Portable DVD Player for Notebook PC, Smartphone, Tablet or Apple TV.--- abstract: 'A closed Riemannian manifold M is said to be K -convex provided that for any $x, y \in M$ there exists a unique minimal geodesic γ_{xy} such that γ_{xy}

$d_M(\gamma_{xy}(0), \gamma_{xy}(c)) \leq \frac{1}{K}c$ for some positive constant c . (A manifold is said to be K -convex if $K = \infty$.) The main purpose of this article is to show that any closed K -convex manifold is complete with a harmonic and a weakly complete almost Kähler metric. Since these results can be viewed as complement of the ones proved in [Kab] for noncompact K -convex manifolds, we have another proof of the uniqueness of the Riemannian distance on noncompact complete K -convex manifolds.' author: - Daiki KABUEDA date: title: | Complete noncompact K -convex manifolds\ with harmonic and weakly complete almost Kähler metrics --- 5 pt .5 cm [Department of Mathematics and Information Sciences,\ Tokyo Metropolitan University,\ 1-1 Minami-Osawa, Hachioji, Tokyo 192-0397, Japan\ [*E-mail address*]{} :[kab@math.metro-u.ac.jp]{}{} 2010 Mathematics Subject Classification.
