The UN report stated that "gangs are expanding, with the number of incidents involving guns growing at an alarming rate." It also concluded that "nearly two million people died in firearm-related homicides and nearly 50,000 people died as a result of homicide in the six years leading up to 2018." To come to their conclusions, the UN used a "public health" and "forensic" method to look at gang-related murders over the past few years.
