Our ambition is to revolutionize the way players use video data to enhance the movement of their players,” said FIFA Lead Producer Dr Jurgen Visel. “Motion capture suits have been around for a long time, but we've made a breakthrough in using thousands of bits of data to create realistic movement on the pitch. Our goal is to immerse the player in a completely different world, where you can enjoy an authentic experience playing in the most realistic FIFA game ever.” Today’s additions to the EA SPORTS Football Club include an updated overhaul of the Career Mode, Career Roadshow, the introduction of the new Player Roster, and the ongoing improvements to the Transfer Market. This season, we are introducing a new FUT Draft Style of Ultimate Team mode. The Draft Style can now be played in a variety of game modes including 5v5 and 5v3, in offline and online modes, and for the first time online only. We are also introducing the ability to set a pick in the Draft Style of Ultimate Team mode from an earlier draft. You can also now play with more players in a 4v4 draft style. We are also introducing a new Player Roster. This is a new section of the Central Update Center on PS4 that lets you select which footballers you will play as in Ultimate Team mode. The new section will be accessible via “Equipment” in the main menu and can be used to save players from your current style in a new team. There are 50 new footballers in this season’s roster, including 40 FIFA stars and 10 FUT legends, such as Ronaldinho, Didier Drogba and Zinedine Zidane. We are also bringing back one of the most popular Ultimate Team players from last year – the iconic Lionel Messi. Players in the player roster can be saved to “Your Squad” and then imported into Ultimate Team – from there they can be selected to play in a 5v5, 5v3 offline or online mode. We

are also bringing back the popular Gameweek Experience. This week's action takes place over 4 matches in 2 games, with the Double Gameweek happening later in the calendar. The 4 matches in a gameweek take place on consecutive days - with the Double Gameweek occurring over a weekend, typically on a Friday and Saturday.

Features Key:

- **MANAGER** - Build your brand new Manchester City club from the ground-up using the Ultimate Team methods. Create a brand new club, build the stadium, create the players, upgrade the players, create your kits, style the uniforms, and watch your team play as a real world club.
- **MAKE ROULETTE TESTS** - Play more than 40 of FIFA's greatest matches from all eras and all competitions. Test your skills in one-on-one matches against all football legends, with each winner receiving up to five gold coins. And take to the pitch yourself, in bespoke matches with your created footballing stars.
- **GEO-MODED GAME** - For the first time, you can explore the globe through FIFA's new Location-Based Match Creator mode. Test your skills in friendly matches against other players across multiple areas around the world, setting your own fixtures and making your results through to the final whistle.
- **BRUTAL** - Create a new class of player from the ground-up to devastate the opposition in 4-player battles. The in-depth sandbox features include Dodge tackles, Haymakers, Head Kicks, and proper set-pieces, where now players can use everything in their arsenal to win games.
- **CLASSIC COACHING MOVES** - Publish your tactics and quickly improve your team's quality by holding training sessions and paying fines for poor performances. Cut the club's wages to win important matches - or build your team from scratch with the Ultimate Team Manager.
- **FLAT PLAYSTATIONS** - Now PlayStation 4 and Xbox One players have full access to all game modes and features of FIFA such as player-driven transfers, card variety, and completely reworked gameplay mechanics including new ball physics, passing and off-the-ball actions that give players more to do in the final third of the pitch.
- **TRANSFER TRACKER** - Last summer's summer transfer window is on the way back - connecting you to players, clubs, and squads via a brand new customization screen with clear values and ratings. Use your transfer funds to trade with other players, improve your squad's overall team value, and unlock powerful, player-oriented players such as the new Transfer Bureau agents. This year, the Transfer Tracker will track free agents, too, so if you've been waiting for a free agent that nobody else sees, there💎

Powered by Football™, EA SPORTS Fifa 22 Product Key brings the game even closer to the real thing with fundamental gameplay advances and a new season of innovation across every mode. The unique and dynamic “Powered by Football” game engine features improved ball and player physics, and a huge library of real-world football training data to recreate authentic player behavior and player intelligence, and deliver an authentic matchday experience and authentic skill updates. With an all-new game engine, new animation and player models, and the most complete overhaul of the game’s overflow camera system ever seen, FIFA feels more authentic than ever before. The most important facet of FIFA, however, is what’s between the ears. Players use player intelligence (“Psyching”) to put players in positions where they’ll make the best decisions, and they’ll use player movement, positioning, running patterns, and quick thinking to keep their nerves steady and chances alive. The player intelligence features in FIFA have been improved. Experienced players can play FIFA as if they were playing with the ball at their feet. Every movement, tackle and pass decision players make is modeled and calculated on how human players would make them. We also improved our camera system. With this year’s release, we’re introducing a wider field of view – which means that the camera will not always be in a straight line to the ball, and provides an improved visual experience. Fifa 22 Free Download includes the following new features: AI We’ve improved the depth of the AI. Put in the right position, players will make better decisions, understand the game and find great moves – and so will you. Another highlight of AI has been the new and improved animations. With the new animation-based system, we’re using the movement, body and skills of players to make them feel more lifelike and natural. The AI now understands how to play in more advanced positions like third and defensive

midfield. They'll connect and distribute the ball intelligently. We've also made all-new animations for key passes, incisive passes, through passes and dribbling. The AI's playmaking ability has been made even better thanks to "live" and updated tactics and playbooks. Decisions will be based on the game and positions players

Coaching - Train and lead your entire team like a football manager. Run your tactics, bench players, and use tactical drills to maximize your team's performance. Order substitutions or take advantage of the many new training drills. In Training, share tactics with a club-mate and let them test their new tactics on you.

FIFA 22 - PITCH PHYSICS The FIFA Ball Physics engine delivers refined pitch surfaces with varying characteristics including durability and player control. The precise and intelligent engine ensures both high speed and sustained motion through the ball, as well as realistic rebounds off the pitch surface. There will be over 100 unique pitches to master and opponents will react to player moves and tactics more realistically. Players will make decisions more intuitively, especially on small pitches and cluttered and unclear fields.

TRANSITION Fast paced action and new attacking options will be easy to see and play in FIFA 22.

Players can now shoot on goal with a new quick-release controller button on the right analog stick. Players can now press a button to play through a defender by splitting them and creating a 3 vs 3 scenario. And thanks to Zones, controlled through the D-Pad, players can now target specific areas on a pitch to receive a direct free kick or a throw-in, or create a 5 vs 5 or 7 vs 7 situation. MULTIPLAYER The FIFA Ball Physics engine allows for greater player and team movement in the FIFA 22 game. From the new Double-Sided Movement System to the new Running and Sprinting Control, FIFA can simulate every step of a player's run. And, with increased ball control, players can now perform near-perfect touches from the run-up and can now dribble with controlled power and speed. BALANCE & CONTRA ATTACK FIFA 22 introduces a new feature that gives an overall feel for the

System Requirements:

Graphics: We are looking for a full-featured game engine that will work across all platforms. But, due to the fact that we will likely be on Windows, which is more difficult to test, we will only consider Linux and Macintosh. While we do accept suggestions for Windows compatibility, it will be tough to implement and have enough users on the Windows platform to test it. A computer that has at least a 1.0 GHz processor and at least 256 MB of RAM. This is enough to run the games, but you may wish to have more if you want to
