From the creators of Fatigue, comes another addictive puzzle game featuring the same addictive feel. Yet, Dots is more than just a new puzzle game, it's the ultimate calorie counter! All you need to do is balance the dots by placing like colored dots on the board. But beware, the colored dots do more than just take up space. Each colored dot has a calorie cost. The most expensive dot of all is the caffeine, which is cost 10 cents per dot! And if you miss your health goal, the dots on the board will disappear. The default goal is to balance 20 cups of calories on each game, while it can be upgraded to balance the most favorite cups of coffee on each game! Try each of the color dots on your way to the top of the leaderboard! M U S I C: The player's goal is to push the colored grid to collapse. To do so, the player will have to carefully select a group of hexagons (bubbles) of the same color. When collapsing one bubble of the

---

same color, it will shrink to the next column which will shrink in turn, until all of the hexagons of that color are collapsed (this can be done with multiples of different colored hexagons). The player wins when the board is fully collapsed. Is the player winning? Don't count on it! The board appears to be fully collapsed when the 10 cups of calory goal is accomplished, but the board is not truly collapsed! There are "holes" in the board that can be covered with a colored hexagon, but until all bubbles of the same color are collapsed, the board remains "off" and the player is still in the game. The player can finish the game by collapsing a specific color in their turn (by using different colored hexagons). The player can win even if they covered the bubbles of a single color. Stay hydrated and enjoy! P.S. The player should also be taking advantage of their health bar, so long as the player is in the game! Game Mode: "NEW PLANET!" You will find yourself in the new world for TTRPG, completely unexplored. Your goal is to run out of your ship into the ruins. In the brave new world of the unknown, you are the only defense. Whoever can hold on to the passageway to the ruins for the longest period of time, wins. Your goal is to hold onto the ruins, hand in hand with your chariot, and after entering through the passageway at the top, it is not guaranteed that you will find somewhere safe there. On the ground, you are the predator, who waits in ambush, cunning and ruthless, in the

embrace of death, ready to pounce on you at any moment. Game Mechanics: "Action Gameplay" The action gameplay mode requires you to use your intuition in a puzzle. As you progress, you must dodge and manage your momentum carefully, otherwise, you will be hit by the many obstacles. You can see how your momentum is being calculated in real-time. When you enter a new location for the first time, you will be equipped with a warning of the "danger threshold" for the rest of your session. "Adventure Gameplay" Another mode that emphasizes the element of "adventure" by using the different environments in the map in different ways. The task for you is to move through the maze with your chariot in the shortest possible time and pass through the obstacle course, no matter what the traps are in your path. If you can run through a maze before it is too late, you can capture the treasure. You can choose whether to play in "Action mode" or in "Adventure mode" as you begin. "Vanishing Map" If you lose your life on the ground map, you can continue your next session with a new equipment. This time your equipment will be completely different from the previous session. You will receive a special symbol when you die during your session. You can see whether it is on the ground map or on the top map, and if the death occurred on the top map, you will drop everything on the ground and will have to start all over again. In this DLC, the obstacle course is modified from the one in the base game. Traps are now more inventive, cunning, and in the end, more dangerous. A new map will be added to the game for the second season. "Action
