Messaging app WhatsApp is facing controversy after gaining popularity among women, following the initial success of its latest update to WhatsApp Direct, where women can chat with men to avoid questions such as the "Where are you from?" or "Where do you work?". WhatsApp has been getting a "lot" of attention over the past few months, following the roll-out of video calling, WhatsApp Direct, the public photo sharing application WhatsApp Web, among other new features. While the former two have been widely seen as ways of helping people save money and energy on international calls, WhatsApp Direct has raised some eyebrows. WhatsApp Direct allows users to chat and make voice and video calls to other WhatsApp users. It is basically a chat option that aims to let users avoid having to choose "real people" or "bots", or tell their news feed that they want to talk to someone else. It works like this: When you join a group chat, you can ask other users to make a WhatsApp Direct call with you. In return, you will be able to see calls, messages, photos, etc. from those users in your chats. The new update is easily one of the best features, ever offered in the application. This is because it means you can avoid having to choose real people or bots from various Facebook groups, or having to tell your news feed that you'd like to chat with someone else. This means that you can save time, money, and energy. But the fact that women are finding this application so appealing is quite alarming. While this new feature is more of a novelty than a revolution, the fact that more and more women are seeing the opportunity to make calls with men, not on calls with their families, friends, colleagues, and neighbors, or even in the few "real women" communities on Facebook, is a step in the wrong direction. Naturally, it has caused controversy. WhatsApp has faced accusations of sexism, with even the platform's CEO Jan Koum commenting that WhatsApp is not about sexism, while also acknowledging the fact that the application is not designed for that. The company has also faced criticism, in fact. It has been said that the application's emergence is the b7e8fdf5c8
