All you do is move around in the VR world and use the free-cam controls to look around. Below you can see a video of the VR experience as I play it in VR. The room moves in sync with my motion, and my view is slightly inverted (like being "behind" the astronauts). If you'd like to watch the video without using your Oculus or Vive headsets you can do so here: Screenshots: Download the lite version now for just \$19.99 from Oculus Store. Lite version doesn't contain any extra features but provides you with the test area. \$49.99 : The full version of "VR2Space" from the Oculus Store. It contains the flying experience, the training environment, and extra features like one-click 6DOF control and a virtual reality table. Here is a full list of features: \* Two VR experiences: Training and Space. \* Training VR experience is used to learn the controls and provide VR orientation experience. \* Space VR experience takes you on a journey that will force you to explore the wonders of space in a new way. \* You can choose between two modes of travel: standing/floating. \* The first mode of flying is with the help of the free-cam. \* 2+1 free-cam controls that let you look around and be able to move while flying in space. \* You can select 6DOF controller to enable one-click controls, or double tap to move. \* Turn on "LookRotation" to enable you to look around in different directions even when you are in space. \* Experience "VR Table". \* Free-cam's auto locking: • You are given free-cam controls and have the option of locking the free-cam to the "table". • You can simply tilt the head to be able to look around in any direction. \* Experience the floating experience. • You are given a VR experience for floating and when you reach the desired altitude you can jump off the floating platform. You can free-fall, slow down, or just jump off the platform and the camera will return to normal position. \* Remote control: • You can use external controllers like Oculus Touch or ViveTouch. • Dual analog sticks will allow you to control your movements and to look around. \* Obstacles: • You can jump off of the

## **What's new:**

**Over the past few weeks, my break-up has been worse than a high-maintenance woman. A total catastrophe, demanding everything you have to be kept clean and looking beautiful and having your heart and mind invaded and blown apart. I knew I should've been careful, but what if I fail? What if I lose this guy who's supposed to be perfect, and I'm failing, and I don't deserve to be so completely devastated? And what if he's hurting and hurting and doesn't know it? Not just the relationship—I'm worried about myself. I'm worrying about things leaking out. I'm worried about memories getting ruined. I'm worried about everything I thought I knew and don't now. Enter: Heartbreak High. It's a break-up simulator where the player is you—the lover, the boyfriend, the cheating girlfriend, any kind of sensation you're having right now. It's two lives struggling together, which are two tracks—one stressing over a health-loving diet, the other stressing over - a male body. I understand if you don't feel ready to love this much. There's a way to break-up, and everyone's got their own way of doing it, whether they're thinking about it or not. My way of breaking up isn't polite, but it's easier for me to do it this way. I hope the way I'm doing it can help you. You're wondering if you're doomed. Don't worry, the trend is towards reason. Each love simulation is designed to be as realistic as possible, so your relationship will pass the first nine times or so and have its highs and lows. Get those highs and you'll have your answer. There's a Best Mode with an audience of nine Love Sims among a group of you creating a relationship together—no dating simifies. No rules, no limits. I said you're wondering. You want to find out how much you're worth, but you're not going to worry too much. Love is the most complicated thing in the world, it's a challenge. If the standard break-up doesn't feel as**

Undead development is a VR game that uses the third-person platformer genre to create a series of environments for the player to explore. The player can use items gathered from the environment to defend themselves, but nothing lasts forever. The goal is to remain in the game for as long as possible. Once in the game, the player is free to explore and build their own base for defense. The player can use any combination of items to barricade up any holes in the walls and floors of their home. Pricing and Availability Undead Development is available for \$24.99 on all major platforms. Additional Information Developed by: Dead End Gameworks Platforms: PC, Mac, Oculus, Daydream & Gear VR Genre: Third-Person Shooter / Platformer For fans of: Homefront, Dead Island, Star Wars 1313 For a given initial condition on the wave function, one can obtain the time evolution of the wave packet via integrating over all the classical paths (see Fig. 4). In the present case, the initial condition of the wave function is simply given by a Gaussian wave packet (5) with a specified width in position space. By doing so, one can obtain an almost undistorted projectile trajectory in momentum space due to the mode-mixing.
