He killed 20 children and 7 adults, making this the deadliest mass shooting in modern American history. While the sounds of gunfire are extremely difficult to hear, we are about to hear about the many prayers our brothers and sisters are sending up for Newtown, Connecticut. There are literally hundreds of prayers from people across our community. This is the most powerful communal act we all take part in. Our children are in danger and in need of our prayers. Please call your church, synagogue or mosque and let them know you are supporting them with prayer. 2 Responses to Prayers For Newtown I know I speak for many when I say that the horror of this week has made me want to experience your pain on a global level. Through my art, I hope to help others relate to the heinousness of the situation. Prayer and peace to all affected, and may the daily darkness of ignorance not

I have been given the following exercise: In the picture, the bold line shows the path of values a function $f(x)$ takes as it goes from $(0,a)$ to $(b,0)$. I think I have solved it as well, but I would like to check, as my confidence grows. Now, I know this: If $x=0$, then $f(x) = 1$ If $x=\frac{\pi}{2}$, then $f(x) = \frac{\sqrt{2}}{2}$ I have calculated the first derivative ($f'(x)$) If $x=0$, $f'(x)=0$, If $x=\frac{\pi}{2}$, then $f'(x)=-\frac{\sqrt{2}}{2}$, And then, I need to calculate $f'(x)$ at $x=\frac{\pi}{4}$
