Insert the pen-drive or the installation CD into the CD-ROM drive and select 'Autodesk Autocad' from the list of applications on the CD. You may need to log on to your Autodesk Autocad account (if you have one). On the CD, select 'Autodesk Autocad 14 - Autodesk AutoCAD 14 Personal Edition' from the list of applications. If you do not have Autodesk Autocad 14, you must upgrade to Autodesk Autocad 14. The upgrade to Autodesk Autocad 14 will automatically be included on the CD. Follow the on-screen instructions to complete the installation. After installing Autodesk Autocad, restart your computer. If you have Autodesk Autocad 14, use the 'Activate / Install' button and follow the on-screen instructions to complete the installation. For information about using Autodesk Autocad 14 and any associated products, please visit www.autodesk.com/autocad I don't use Autocad as much as AutoCAD, but that seemed to be my only option. I've been using it for a while, and in that time, I've always downloaded an official.zip file from their website, then used the.zip file to unzip the.msi or.exe file. My biggest problem with this method has been the inconsistency of the zip file. Recently, I have noticed that this company, Autodesk, has made it possible to download Autocad and create Autocad 2013 and Autocad 2014.zip files that you can use as a "key" in addition to the Autodesk Autocad.exe or.msi file. These are very consistent, and you can create them yourself. Autodesk Autocad Registration Keygen is a special file that must be downloaded and run to make this work. Don't forget that you must have an active subscription with Autodesk to download Autocad. Otherwise, you will have to buy a copy. I hope this helps. Source: Autodesk Autocad Help Center A: Autodesk
