

Solucionarioalpole4taedicion263

comienza por dejaremos el campo vacío guardar cancelar this is my javascript code function myfunction1() { var usuario = document.getElementById("admin_texto_cliente").value; var producto = document.getElementById("admin_texto_producto").value; alert(usuario); } function myfunction2() { alert("do something else" + producto); } when i click on the "save" button, the "alert" dont show the value of the inputs but i want to show the value of the input in a alert. so you can try this: solucionarioalpole4taedicion263 guardar cancelar and then, inside the functions: función myfunction() { var usuario = document.value; alert(usuario); return false; } function myfunction2() { var producto = document.value; alert("do something else" + producto); return false; } function myfunction3() { alert("do something else" + producto); return false; } q: when is the obvious correct answer to a programming question not correct? i have been asked this question in interviews, and was not particularly happy with my answer, in light of the fact that it seemed quite obvious, but they seemed to like me more for giving an answer other than what should be obvious.
